## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4-6, 8, 9, and 11-16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by BONN (4,888,655).

Note figures 3 and 4. BONN shows a disk drive with a base and cover (7), a recirculation filter (110) held in place by two holders (112) located on the cover. The filter has thinner insertion portions that firmly fit in the grooves in the holder, and thus the length and width of the insertion portions are substantially the same as the mounting grooves in the holders (see column 4 lines 8-10). The length of the filtering portion is substantially equal to the spacing between the holders.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3, 7, 10, and 17-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over BONN (4,888,655).

Art Unit: 2652

BONN shows a disk drive with a recirculation filter structure substantially as claimed.

BONN differs in not specifying a different material for the insertion portions of the filter.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize a different material for the insertion portions of the filter in BONN. The motivation is as follows: these are art recognized equivalents that operate in the same manner and produce the same results without any unexpected results. The exact material of the insertion portions has no operational significance. All that matters is that the insertion ends fully fill the grooves in the holders, which BONN teaches.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert S Tupper whose telephone number is 703-308-1601. The examiner can normally be reached on Mon - Fri, 6:00 AM - 3:30 PM (first Fri off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hoa Nguyen can be reached on 703-305-9687. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
